I got a red house on the hill

I got an orange president

I got a green back dollar bill

And nothing's making sense

I got a brown eyed lady friend

She got no advice for me

It's a blue blue future

Far as I see

Well I'm walking through the airport

What do you think I see

Whole lotta people jammed together

All as lonesome as can be

How do we come together

When we're lost inside our screens

It's a blue blue future

Far as I see

Every day I wake up with a feeling like I been turned upside down
Too much info all day and all night makes my head go spinning round
I don't know my neighbors and I wonder what they think
No matter who you trust you know that everyone's on the brink

Give up your black cat bone
Throw away your mojo tooth
Send little John the conkerroo home
He can't do nothing for you

And if we tear the whole thing down
What good does that do you or me
It's a blue blue future
As far as I see
It's a blue
Blue future
Far as I see
